新課介紹

課程名稱：Emerging Technologies and Issues in Analytics for Business

Many organizations are learning that in today's environment, an effective use of technologies and risk management program have become necessary components of business success. This course explores some emerging technologies used in business and critical issues surrounding the use of them as business enablers associated with the management of technology in the corporate world. Key types of technology to business risks within this area that will be explored are cybersecurity, data breaches, the internet of things, artificial intelligence and automation, cloud computing, technology obsolescence, and social media management.

Students will learn key concepts for implementing and maintaining a technology risk identification and assessment program. The purpose of these programs is to guide the organization in identifying an approach to effectively manage the technology risks that impact the business risks associated with operating in a rapidly changing technological environment.
